

EDUCATION

- > Northeastern University** | Khoury College of Computer Sciences | Honors Boston, MA
 Candidate, B.S. Computer Science & Mathematics \ \ Physics & Chemistry Minor \ \ 3.87 GPA 2021 – May 2025

RESEARCH AND WORK | * := Part-Time, † := Under Non-Disclosure Agreement

- > Computational Protein Design Co-op @ Tessera Therapeutics[†]:** Gene Therapy Jan. 2024 – June 2024
 - Analyzed biological data for protein engineering of genetic medicines.
 - Developed tool to visualize and analyze protein structure and mutational data using Dash and plotly.
- > Software Engineering Co-op @ Nth Cycle:** Metal Refining Startup Jan. 2023 – June 2023
 - Identified problems with data capture and analysis such as manually transcribing pdfs, siloed data analysis procedures, nonstandardized datasheets, and exclusively using Excel/paper. Designed and implemented a webapp (see LUCAS project) which used drag-and-drop libraries and MongoDB for a no-code solution.
 - Fixed problems with internet, printers, laptops, AzureVPN and Remote Desktop in lieu of an IT department.
- > Peer Tutoring*:** Discrete, Fundies 1 & 2, OOD, Algo, Phys 2, Calc 3, LinAlg, Prob & Stats Sep. 2022 – June 2023
 - Demonstrate patience and professionalism with tutees having a variety of skill levels. 164 hours total \approx 4 hrs/wk
- > Sijia Dong Lab.*:** Computational chemistry research group Dec. 2021 – Jan. 2023
 - Used automation scripts and ML to investigate ligand-protein binding.
- > Northeastern Undergrad Computer Architecture Research Group*:** Nov. 2021 – May 2022
 - Learned C and beginner CUDA through programming challenges given by Prof. Kaeli.
- > Internship with Town of Holliston Director of Technology*:** Nov. 2020 – Feb. 2021, Apr. 2021 – May 2021
 - Setup and resolve problems with phones, printers, desktops, software, and file storage for municipal departments.

COURSES AND TECH STACK | * := In progress/learning, † := Included lab portion

- > Tech:** Typescript, React, Python, MongoDB, Java, Lean4, Bash, Linux, C, Mathematica, Rust*
- > CS:** AI*, Software Development*, Networks & Distributed Systems, Object Oriented Design, Logic & Computation
- > Math:** Statistics & Stochastic Processes, Linear Algebra, Number Theory, Group Theory, Calculus 3, Diff. Eq.
- > Chemistry:** Organic Chemistry 1[†] & 2[†], Physical Chemistry[†], Analytical Chemistry*[†], Quantum Chemistry*[†]
- > Physics:** Quantum Computation and Information, Electronics*[†], Modern Physics

PROJECTS

- > LUCAS** | *ReactTS, MongoDB, Azure, , * /lucas-demo-screenshots Feb. 2023 – Jun. 2023
 Webapp which enabled drag-and-drop design of forms and data analysis pipelines and graphics. Enabled parsing of files output from a specific machine to upload multiple documents with same metadata, dimensional analysis in pipelines, linking a sample to the other steps in its history, which could have both branching and merging, and the capability to make graphs and tables, all without (them) coding. *Access to live demo available on request. Written for Nth Cycle.*
- > ML Excitation Model** | *Python, Maestro, MATLAB, Bash, TensorFlow* Aug. 2022 – Jan. 2023
 Identify what aspects of chloramide, flavins, and styrene influence their excitation wavelengths when they are in proximity to each other. Have written a MATLAB/Python/bash script that transforms the raw coordinates of each atom into more usable and interpretable features, which then can be used as input for a neural network or rounded for use in a neural network to predict excitation wavelengths and strengths. *Completed as part of Sijia Dong Lab.*
- > Automated Docker** | *Python, Schrodinger, Slurm, QtPy* /automated_docking_script July 2022
 Designed a GUI add-on and backend script for Schrodinger Maestro that automated a time-consuming and error-prone process of generating docking poses for three molecules in all permutations. *Completed as part of Sijia Dong Lab.*
- > N-Bullets in Racket** | *Intermediate Student Language (Racket subset)* /nbulletsrkt Apr. 2022
 Rewrote a project for a Java-based course in Racket to compare the two languages. Racket was terser, easier to properly test, and (subjectively) more readable. Additional findings and opinions are in the README.
- > Grave Finder** | *ReactJS, PHP, MySQL, Cloudflare, cPanel, SSL* /findagravemiddleborough.ml Dec. 2020
 Website to view grave data for a local cemetery preservation nonprofit. Makes use of join tables, searching, filtering, React+MaterialUI forms, and an administrator login with a cooldown period after too many login attempts.
